FINAL EXAMINATION

TRIMESTER 3, 2022/2023

BAC1644 – PRINCIPLES OF FINANCE

2nd OCTOBER 2023
9.00 a.m – 12.00 p.m
(3 Hours)

INSTRUCTIONS TO STUDENTS

1. This question paper consists of EIGHT **(8)** printed pages with four **(4)** questions and 4 financial tables *excluding* the cover page.
2. Attempt **ALL** questions.
3. Please write all your answer in the **Answer Booklet** provided.
4. Marks are shown at the end of each question.

There are FOUR (4) questions in this section. Answer ALL questions.

Question 1 (25 marks)

a. Bauman Bhd's total current assets, total current liabilities, and inventory for each of the past 4 years follow:

Item	Year 2020 (RM)	Year 2021 (RM)	Year 2022 (RM)
Total current assets	21,900	22,500	27,000
Total current liabilities	12,600	12,600	17,400
Inventory	6,900	6,900	7,200

i. Calculate the firm's current and quick ratios for each year. Compare the resulting time series for these measures of liquidity.

(12 marks)

ii. Comment on the firm's liquidity over the 2020–2022 period.

(5 marks)

b. Rick is planning to invest the following amounts at 6 percent interest. How much money will he have saved at the end of year 3?

End of Year	Amount Saved (RM)
1	500
2	800
3	900

(8 marks)

Continued...

Question 2 (25 Marks)

a. A RM1,000 face value bond currently has a yield to maturity of 8 percent. The bond matures in 9 years and pays interest annually. The coupon rate is 6 percent. What is the current price of this bond? Briefly explain is the bond selling at discount, par or discount?

(10 marks)

b. You are analysing the stock of Sihat Bhd, a healthcare company with a current stock price of RM75. The company just paid an annual dividend of RM2.50, and it is expected that the dividend will grow at 25% in the next 3 years and then decrease to 6% per year thereafter. You estimate that the required return of the stock is 13%. Estimate the stock price of Sihat Bhd by using a variable growth dividend discount model. Is the stock *fairly priced*, *overpriced*, or *underpriced*?

(15 marks)

Question 3 (25 marks)

a. Projects A and B are two mutually exclusive projects. Both projects are of equal risk and are alternatives for expanding Rosa Bhd's capacity. The firm's cost of capital is 10%. The cash flows for each project are shown in the following table.

Year	Project A (RM)	Project B (RM)
0	-365,000	-40,000
1	38,000	20,300
2	47,000	15,200
3	62,000	14,100
4	455,000	11,200

i. Calculate each project's Payback Period.

(4 marks)

ii. Calculate the Net Present Value (NPV) for each project.

(6 marks)

iii. Calculate the Profitability Index (PI) for each project

(6 marks)

Continued...

iv. Summarize the preferences dictated by each measure and indicate which project you would recommend. Explain why.

(3 marks)

b. Metal Supplies is concerned about its cash management. On average, the day's sales in inventory (duration of inventory on shelf) is 90 days. Accounts receivables are collected in 90 days, while accounts payable are paid in 60 days. Metal Supplies has annual sales of RM14 million, cost of goods sold of RM9.5 million, and purchases of RM5 million. (Note: Use a 365-day year.)

i. What is Metal Supplies' operating cycle (OC)?

(3 marks)

ii. What is Metal Supplies' cash conversion cycle?

(3 marks)

Question 4 (25 marks)

a. A firm has determined its optimal capital structure which is composed of the following sources and target market value proportions as presented in the Table 1 below.

Table 1

Source of Capital	Target Market Proportions
Long-term debt	30%
Preferred stock	15%
Common stock equity	55%

Debt: The firm can sell a 10-year, RM1,000 par value, 8 percent bond for RM960. A flotation cost of 2 percent of the face value would be required in addition to the discount of RM40.

Preferred Stock: The firm has determined it can issue preferred stock at RM77 per share par value. The stock will pay a RM10 annual dividend. The cost of issuing and selling the stock is RM2 per share.

Common Stock: A firm's common stock is currently selling for RM18 per share. The dividend expected to be paid at the end of the coming year is RM1.74. Its dividend payments are expected to grow at 4%. It is expected that to sell, a new common stock issue must be underpriced RM1 per share in floatation costs. Additionally, the firm's marginal tax rate is 40 percent.

Continued...

i. Calculate the after-tax cost of debt.

(5 marks)

ii. Calculate the cost of preferred stock.

(5 marks)

iii. Calculate the cost of new common stock.

(5 marks)

iv. Calculate the firm's weighted average cost of capital (WACC) using the capital structure weights shown in **Table 1** above.

(5 marks)

b. Canggih Bhd uses 1,150 switch assemblies per week and then reorders another 1,150. The relevant carrying cost per switch assembly is RM5.50 and the fixed order cost is RM625.

i. Calculate the Economic Order Quantity (EOQ) for Canggih Bhd.

(3 marks)

ii. Is the company's inventory policy optimal? Why or why not?

(2 marks)

End of Questions

Financial Tables
